2004 Publications, by Category and Page Number

The index appears in three parts. The first, which begins below, lists publications by major category, and within categories, by page number, In order, the categories are Original Articles, Concise Communications, Editorials, SHEA Position Papers, Readers' Forums, the Sections, and Letters to the Editor. Items published in Medical News are not indexed.

This comprehensive list is followed by the Author Index (page 1127) and the Subject Index (page 1136). Each entry in these two indices points to a major category and page number in the comprehensive list below, where the complete citation may be found.—Ed.

ORIGINAL ARTICLES

Guallar C, Ariza J, Dominguez MA, Peña C, Grau I, Verdaguer R, Torrens L, Gudiol F. An insidious outbreak due to *Salmonella enteritidis*. 2004;25(1):10-15.

Askarian M, Kabir G, Aminbaig M, Memish ZA, Jafari P. Knowledge, attitudes, and practices of food service staff regarding food hygiene in Shiraz, Iran. 2004;25(1):16-20.

Dettenkofer M, Seegers S, Antes G, Motschall E, Schumacher M, Daschner FD. Does the architecture of hospital facilities influence nosocomial infection rates? A systematic review. 2004;25(1):21-25.

Dunkelberg H, Wedekind S. Preliminary results for a new final package test to assess the quality of sterile package systems. 2004;25(1):26-29.

Dentinger C, Pasat L, Popa M, Hutin YJF, Mast EE. Injection practices in Romania: progress and challenges. 2004;25(1):30-35.

Moro ML, Petrosillo N, Gandin C, Bella A. Infection control programs in Italian hospitals. 2004;25(1):36-40.

Rosselló-Urgell J, Vaqué-Rafart J, Hermosilla-Pérez E, Allepuz-Palau A, the EPINE Working Group. An approach to the study of potentially preventable nosocomial infections. 2004;25(1):41-46.

Rosenthal VD, Guzman S, Safdar N. Effect of education and performance feedback on rates of catheter-associated urinary tract infection in intensive care units in Argentina. 2004;25(1):47-50.

Sugahara H, Mizuki M, Matsumae S, Nabetani Y, Kikuchi M, Kanakura Y. Footwear exchange has no influence on the incidence of febrile neutropenia in patients undergoing chemotherapy for hematologic malignancies. 2004;25(1):51-54.

Alweis RL, DiRosario K, Conidi G, Kain KC, Olans R, Tully JL. Serial nosocomial transmission of *Plasmodium falciparum* malaria from patient to nurse to patient. 2004;25(1):55-59.

Yang Y-L, Ho Y-A, Cheng H-H, Ho M, Lo H-J. Susceptibilities of *Candida* species to amphotericin B and fluconazole: the emergence of fluconazole resistance in *Candida tropicalis*. 2004;25(1):60-64.

Jamasbi RJ, Kennel SJ, Waters LC, Foote LJ, Ramsey JM. Genetic analysis of *Pseudomonas aeruginosa* by enterobacterial repetitive intergenic consensus polymerase chain reaction (PCR) and arbitrarily primed PCR: gel analysis compared with microchip gel electrophoresis. 2004;25(1):65-71.

Warren DK, Nitin A, Hill C, Fraser VJ, Kollef MH. Occurrence of co-colonization or co-infection with vancomycin-resistant enterococci and methicillin-resistant *Staphylococcus aureus* in a medical intensive care unit. 2004;25(2):99-104.

Harris AD, Nemoy L, Johnson JA, Martin-Carnahan A, Smith DL, Standiford H, Perencevich EN. Co-carriage rates of vancomycin-resistant *Enterococcus* and extended-spectrum beta-lactamase–producing bacteria among a cohort of intensive care unit patients: implications for an active surveillance program. 2004;25(2):105-108.

Gastmeier P, Schwab F, Geffers C, Rüden H. To isolate or not to isolate? Analysis of data from the German Nosocomial Infection Surveillance System regarding the placement of patients with methicillin-resistant *Staphylococcus aureus* in private rooms in intensive care units. 2004;25(2):109-113.

Eveillard M, Martin Y, Hidri N, Boussougant Y, Joly-Guillou M-L. Carriage of methicillin-resistant *Staphylococcus aureus* among hospital employees: prevalence, duration, and transmission to households. 2004;25(2):114-120.

Leman R, Alvarado-Ramy F, Pocock S, Barg N, Kellum M, McAllister S, Cheek J, Kuehnert M. Nasal carriage of methicillin-resistant *Staphylococcus aureus* in an American Indian population. 2004;25(2):121-125.

Ip M, Lyon DJ, Chio F, Cheng AF. A longitudinal analysis of methicillin-resistant *Staphylococcus aureus* in a Hong Kong teaching hospital. 2004;25(2):126-129.

Dias CG, Röpke MVR, Superti S, Berquó L, d'Azevedo P. Use of a novel selective medium to detect methicillin-resistant *Staphylococcus aureus* in colonized patients of an intensive care unit. 2004;25(2):130-132.

Bassetti S, Wolfisberg L, Jaussi B, Frei R, Kuntze MF, Battegay M, Widmer AF. Carriage of *Staphylococcus aureus* among injection drug users: lower prevalence in an injection heroin maintenance program than in an oral methadone program. 2004;25(2):133-137.

Gould CV, Fishman NO, Nachamkin I, Lautenbach E. Chloramphenicol resistance in vancomycin-resistant enterococcal bacteremia: impact of prior fluoroquinolone use? 2004;25(2):138-145.
